Total Semester Hours Credit

48

* A program designed to meet department requirements for certification of psychology education. Graduates are eligible to apply for the state of Michigan master's educational temporary limited license as a psychologist. Following completion of 2000 hours of post-master's degree experience supervised by a fully licensed psychologist graduates may then be eligible to apply for the Michigan master's limited license as a psychologist. In Michigan a master's limited licensed psychologist may practice under the supervision of a fully licensed psychologist.

** The on-site supervisor must currently hold a full license to practice psychology at the independent level. In Michigan this person is a doctoral level, licensed psychologist. The supervisor may be a staff member, full or part time, or a consultant to the site selected. A minimum of six hundred (600) clock hours are required to complete the field practicum. Students must accrue the hours at a minimum of 20 hours per week in a continuous pattern of contact. A minimum of 240 of the 600 hours must be direct services to clients and others appropriate to the setting. A minimum of 8 hours per month of in person supervision with a fully licensed psychologist is required. Of these 8 hours, a minimum of 1 hour per week must be in individual supervision. The remainder may be arranged to include individual and/or group supervision as appropriate to the student and the site. Additional supervision is recommended as needed and required by the site. Attendance at the weekly CECP 6130 group supervision sessions on campus with a licensed psychologist may be required to obtain the 8 hours per month of supervision with a fully licensed psychologist.
