SAVVY SNACK SALES TASK THREE

Critical Analysis:

• On your own:

  • Using your findings, compare the sales for the two products and assuming the patterns continue as they have, predict which product will sell the most in 20 weeks.

  • What if they decide to continue selling these for the whole year? (Assume a 38-week school year.)

  • What if they sell them for four school years?

• As a group:

  • Compare your predictions.

  • Justify your reasoning to your group mates.
