

Working Group 1: Applying Framework

GROUP LETTER (A-E): ___D___

Please select one or two projects discussed in the morning meeting and use these as case studies to answer:

How do these projects fit within the Framework presented in the conference paper / morning discussion (The foursquare of: individual – collective; prescriptive – emergent):

Henderson Poster: Curriculum & Pedagogy [Unanimous]

How do the ideas / projects NOT fit within the framework?

Sarah Gilbert: Parts fit in all four quadrants

Matthew Hora: If see organizations as complex system and ask why reform does or doesn't work, the distinctions among the quadrants do not help. Strange strategy was complicated and integrated. [Was mandated assessment of "design experiment."]

How might the projects be extended based on the Framework?

Henderson Project: Critique of change strategy. Implies should move more toward reflective teaching, policy and shared vision all at the same time.

How might the Framework be modified, based your discussions of these projects?

Andy Van de Ven. Takes 10 years to become really good at something. Most of projects not going very long.

Quite useful framework for considering how to enrich research projects.
