

## Disable SSL in Firefox

These instructions and screenshots are for Firefox 20 or newer. For older versions, please visit [wmich.edu/helpdesk/disable-ssl3](http://wmich.edu/helpdesk/disable-ssl3).

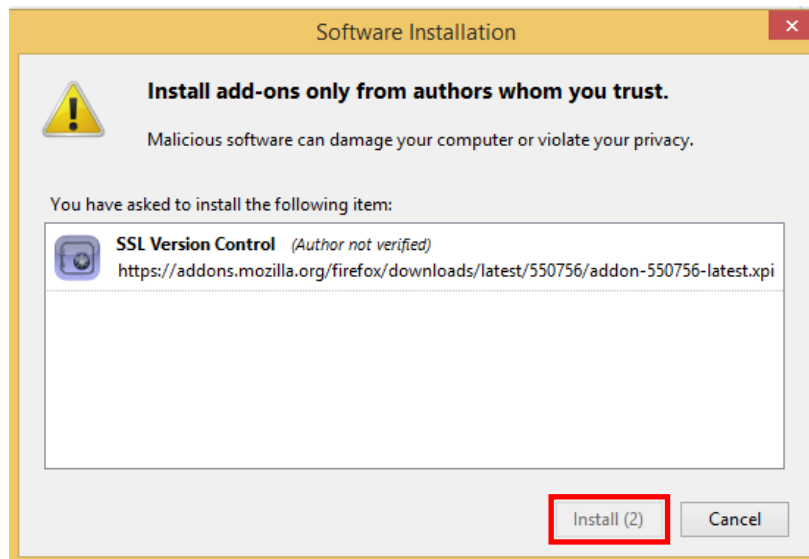

1) Open Firefox and visit <https://addons.mozilla.org/en-US/firefox/addon/ssl-version-control/>

2) Click the + **Add to Firefox** button.

3) Click on the **Install Now** button. Restart **Firefox** once the install has completed.

You have successfully disabled the SSL 3.0 protocol in your Firefox browser.
