Level of Service Standards

Purpose

This document defines and explains the levels of service that can be expected from Western Michigan University’s Maintenance Services unit. It provides an overview of the unit, the priorities of the response and resolution of the issues.

Overview

Maintenance Services is a team of highly skilled trades professionals and management staff who maintain utilities and buildings for the Western Michigan University community. We provide quality service in an efficient and professional manner to ensure a safe and comfortable environment for all facility users. We implement continuous improvement to ensure the highest level of customer satisfaction.

Western Michigan University’s Maintenance Services professionals are responsive to the needs of students, faculty, and staff. Clean, safe facilities, adequate lighting, seating, as well as temperature and noise control, are critical to creating and sustaining positive educational and professional experiences.

Requests are submitted to Maintenance Services by telephone, or by using Bronco Fix-It, the online request system. Requests are processed by Facilities Management Service Center, then distributed to the appropriate Maintenance shop. Maintenance shop supervisors organize the work and distribute to the corresponding skilled trades. Skilled trades perform work and complete work orders.

Services

Definition:

- Do-It-Now Work Orders – Responding to issues that may arise such as lights out, room temperature, etc.
- Preventative Maintenance – Maintenance that is regularly performed on a piece of equipment and other building assets to lessen the likelihood of failure.
- Life Safety – Maintaining building systems that are used in emergency situations such as fire alarm system, emergency lighting, etc.
- Facility Asset Reinvestment – Work that is outside of the normal scope of Maintenance and needs additional resources to be completed such as replacement of large building system, remodels, etc.
Response/Resolution Priorities

All requests for service are assigned a priority which is based on the nature of the issue being reported, the information received from the requestor, and current, outstanding workload. The priority may be adjusted based on a change in conditions or circumstances. In some cases, a temporary solution may be implemented until a permanent resolution is achieved.

<table>
<thead>
<tr>
<th>Priority Level</th>
<th>Scenario</th>
<th>Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 – Critical/Same Day</td>
<td>System failure or safety hazard that affects a portion of a building with a potential of shutting down the building</td>
<td>Immediate response, work until condition is stable and/or completed</td>
</tr>
<tr>
<td>2 – Urgent</td>
<td>Any requests within occupied residential areas or in classrooms</td>
<td>Respond within 24 hours for occupied residential areas Respond within 48 hours for classrooms</td>
</tr>
<tr>
<td>3 – Normal</td>
<td>Issues that create a minor inconvenience for the building or learning/working environment</td>
<td>Completion within 10 business days</td>
</tr>
<tr>
<td>4 – Planned</td>
<td>Preventative maintenance work done to keep building systems working properly</td>
<td>Scheduled work</td>
</tr>
<tr>
<td>5 – Deferred</td>
<td>Miscellaneous building requests that expand beyond the scope of normal maintenance</td>
<td>Assessed, prioritized, and addressed on a yearly basis</td>
</tr>
</tbody>
</table>

Payment for Services

In general, there are no costs associated with routine maintenance. Costs associated with facility issues resulting from vandalism or misuse will be the responsibility of the identified individual or department.

Costs associated with services that exceed the scope of routine maintenance, such as event request services, or a project or renovation, are paid for by the requesting department, for example:

- Staffing, additional equipment or service needs for events
- Maintaining or installing special or dedicated department equipment
- Furniture or work stations
- Appliances
- Office painting
- Carpeting replacement
- Damage of departmental equipment due to water damage or utility outages that are non-scheduled (i.e., computers from water break or equipment power surges due to power interruptions)

Key Performance Indicators

Performance measures are established, measured, and reviewed for continuous improvement. The performance indicators focus on response time, work order backlog, completed work orders versus open work orders, and completed work orders by facility.
