

1. Explain briefly and clearly the proposed improvement.
We are proposing the following change in the graduation requirements
From: **1. A "C" average or better must be earned in required courses with a CCE, IME or ME prefix**
To: **1. A "C" or better must be earned in all courses with a CCE, IME or ME prefix**
2. Rationale. Give your reason(s) for the proposed improvement. (If your proposal includes prerequisites, justify those, too.)
The intent of the language was not to allow any D grade in these engineering courses. The interpretation of the language has been to allow one or two D grades in these courses as long as the average GPA in these courses remains a C or better. So this change will allow us to clearly state this graduation requirement.
3. Effect on other colleges, departments or programs. If consultation with others is required, attach evidence of consultation and support. If objections have been raised, document the resolution. Demonstrate that the program you propose is not a duplication of an existing one.
None.
4. Effect on your department's programs. Show how the proposed change fits with other departmental offerings.
None.
5. Effects on enrolled students: Are program conflicts avoided? Will your proposal make it easier or harder for students to meet graduation requirements? Can students complete the program in a reasonable time? Show that you have considered scheduling needs and demands on students' time. If a required course will be offered during summer only, provide a rationale.
None.
6. Student or external market demand. What is your anticipated student audience? What evidence of student or market demand or need exists? What is the estimated enrollment? What other factors make your proposal beneficial to students?
Not Applicable.
7. Effects on resources. Explain how your proposal would affect department and University resources, including faculty, equipment, space, technology, and library holdings. Tell how you will staff additions to the program. If more advising will be needed, how will you provide for it? How often will course(s) be offered? What will be the initial one-time costs and the ongoing base-funding costs for the proposed program? (Attach additional pages, as necessary.)
None.
8. General education criteria. For a general education course, indicate how this course will meet the criteria for the area or proficiency. (See the General Education Policy for descriptions of each area and proficiency and the criteria. Attach additional pages as necessary. Attach a syllabus if (a) proposing a new course, (b) requesting certification for baccalaureate-level writing, or (c) requesting re-approval of an existing course.)
Not Applicable
9. List the learning outcomes for the proposed course or the revised or proposed major, minor, or concentration. These are the outcomes that the department will use for future assessments of the course or program.
Not Applicable.
10. Describe how this curriculum change is a response to assessment outcomes that are part of a departmental or college assessment plan or informal assessment activities.
Not Applicable.
11. (Undergraduate proposals only) Describe, in detail, how this curriculum change affects transfer articulation for Michigan community colleges. For course changes, include detail on necessary changes to transfer articulation from Michigan community college courses. For new majors or minors, describe transfer guidelines to be developed with Michigan community colleges. For revisions to majors or minors, describe necessary revisions to Michigan community college guidelines. Department chairs should seek assistance from college advising directors or from the admissions office in completing this section.
Not Applicable.

OLD CATALOG DESCRIPTION

Civil Engineering (CIVJ)

The Civil Engineering curriculum prepares students for entry level positions in the civil engineering profession. It was developed to provide students with knowledge in the areas of structural engineering, construction engineering, geotechnical engineering, transportation engineering, and water resources engineering. Technical, communication, and human relation skills are developed throughout the curriculum. Design is emphasized from the beginning of the curriculum.

Accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

(For up-to-date educational objectives and learning outcomes, see department web page at www.wmich.edu/cce/undergrad.php.)

Baccalaureate-Level Writing Requirement

Students who have chosen the Civil or Construction Engineering curriculum will satisfy the Baccalaureate-Level Writing Requirement by successfully completing CCE 4830: Project Design and Control and CCE 4850: Senior Project.

Requirements

Candidates for the Bachelor of Science in Engineering must complete the following program of 126 semester credit hours as well as University requirements stated elsewhere in this catalog.

1. A "C" average or better must be earned in required courses with a CCE, IME or ME prefix.
2. A student is required to earn a grade of "C" or better in the prerequisite courses for all CCE courses before enrollment is permitted in the next sequence course.
3. No more than two grades of "D" or "DC" in courses presented for graduation may be counted for graduation.
4. Complete the following program of 126 semester hours. The schedule below is an example of one leading to graduation in eight semesters. Pre-engineering requirements are indicated.
5. The Civil Engineering curriculum requires students to complete a course in General Education Area I, Area II, Area III, Area IV, Area V, and Area VIII. At least two of the General Education Area courses must be at the 3000/4000-level, and no more than two courses from any one department may be used to satisfy the Area requirements. Civil Engineering majors are required to take PHIL 3160 for Area II and Econ 2010 for Area V.
