REQUEST TO COLLEGE CURRICULUM COMMITTEE FOR CURRICULAR IMPROVEMENTS DEPARTMENT: CCE PROPOSED EFFECTIVE SEMESTER: Spring 2015 COLLEGE: Engineering & Applied Sciences PROPOSED IMPROVEMENTS Academic Program Substantive Course Changes Misc. Course Changes New dearee* New course ☐ Title New major* Pre or Co-requisites Description (attach current & proposed) New curriculum* Deletion (required by others) Deletion (not required by others) Course #. different level Course #. same level New concentration* New certificate Credit hours Variable credit Enrollment restriction Credit/no credit New minor Course-level restriction Cross-listing Revised major Prefix Title and description COGE reapproval Revised minor Other (explain**) Admission requirements (attach current & proposed) Graduation requirements ☐ General education (select one) Deletion Transfer Not Applicable Other (explain**) Other (explain**) ** Other: Title of degree, curriculum, major, minor, concentration, or certificate: Civil Engineering and Construction Engineering Existing course prefix and #: CCE 4380 Proposed course prefix and #: Credit hours: 3 Existing course title: Construction Project Management Proposed course title: Existing course prerequisite & co-requisite(s): (CCE 4310 Minimum Grade of C) AND (CCE 4360 Minimum Grade of C) Proposed course prerequisite(s): (CCE 4310 Minimum Grade of C) OR (CCE 4360 Minimum Grade of C)If there are multiple prerequisites, connect with "and" or "or". To remove prerequisites, enter "none." Proposed course co-requisite(s): If there are multiple corequisites, they are always joined by "and." Proposed course prerequisite(s) that can also be taken concurrently: Is there a minimum grade for the prerequisites or corequisites? The default grades are D for undergraduates and C for graduates. Major/minor or classification restrictions: List the Banner 4 character codes and whether they should be included or excluded. For 5000 level prerequisites & corequisites: Do these apply to: (circle one) undergraduates graduates both Specifications for University Schedule of Classes: a. Course title (maximum of 30 spaces): b. Multi-topic course: No Yes c. Repeatable for credit: \(\subseteq \text{No} \subseteq \text{Yes} \) d. Mandatory credit/no credit: No Yes e. Type of class and contact hours per week (check type and indicate hours as appropriate) 1. Lecture 3. \(\subseteq \text{Lecture/lab/discussion} \) 5. Independent study 6. Supervision or practicum 2. Lab or discussion 4. Seminar or studio CIP Code (Registrar's use only): Chair/Director Date Chair, College Curriculum Committee Date Date: Graduate Dean: Dean Date Curriculum Manager: Return to dean Date Forward to: Date Chair, COGE/ PEB / FS President FOR PROPOSALS REQUIRING GSC/USC REVIEW:

* Approve Disapprove

* Approve Disapprove

Chair, GSC/USC

Provost

- Explain briefly and clearly the proposed improvement.
 Change the pre-requisite requirements from "CCE 4310 AND CCE 4360" to "CCE 4310 OR CCE 4360".
- 2. Rationale. Give your reason(s) for the proposed improvement. (If your proposal includes prerequisites, justify those, too.)

This change will allow more civil engineering students to take this course as elective since they typically take either the CCE 4310 or the CCE 4360 (but rarely both). Allowing civil engineering students who are interested in construction to take CCE 4380 will enrich the experience in the course and will give civil engineering students more options for electives.

- Effect on other colleges, departments or programs. If consultation with others is required, attach evidence of
 consultation and support. If objections have been raised, document the resolution. Demonstrate that the program you
 propose is not a duplication of an existing one.
 No effect.
- 4. Effect on your department's programs. Show how the proposed change fits with other departmental offerings. No effect since the course is always offered in the spring semester and has capacity.
- 5. Effects on enrolled students: Are program conflicts avoided? Will your proposal make it easier or harder for students to meet graduation requirements? Can students complete the program in a reasonable time? Show that you have considered scheduling needs and demands on students' time. If a required course will be offered during summer only, provide a rationale.

It will provide civil engineering students more elective options.

- 6. Student or external market demand. What is your anticipated student audience? What evidence of student or market demand or need exists? What is the estimated enrollment? What other factors make your proposal beneficial to students? Not Applicable.
- 7. Effects on resources. Explain how your proposal would affect department and University resources, including faculty, equipment, space, technology, and library holdings. Tell how you will staff additions to the program. If more advising will be needed, how will you provide for it? How often will course(s) be offered? What will be the initial one-time costs and the ongoing base-funding costs for the proposed program? (Attach additional pages, as necessary.)

 No effect since the course is always offered in the spring semester and has capacity
- 8. General education criteria. For a general education course, indicate how this course will meet the criteria for the area or proficiency. (See the General Education Policy for descriptions of each area and proficiency and the criteria. Attach additional pages as necessary. Attach a syllabus if (a) proposing a new course, (b) requesting certification for baccalaureate-level writing, or (c) requesting re-approval of an existing course.)

 Not applicable.
- List the learning outcomes for the proposed course or the revised or proposed major, minor, or concentration. These
 are the outcomes that the department will use for future assessments of the course or program.
 Not applicable.
- 10. Describe how this curriculum change is a response to assessment outcomes that are part of a departmental or college assessment plan or informal assessment activities. Not applicable.
- 11. (Undergraduate proposals only) Describe, in detail, how this curriculum change affects transfer articulation for Michigan community colleges. For course changes, include detail on necessary changes to transfer articulation from Michigan community college courses. For new majors or minors, describe transfer guidelines to be developed with Michigan community colleges. For revisions to majors or minors, describe necessary revisions to Michigan community college guidelines. Department chairs should seek assistance from college advising directors or from the admissions office in completing this section.
 Not applicable.

Current Catalog Description:

CCE 4380 - Construction Project Management

The characteristics of construction industry, project organizations, labor, material, and equipment utilization, construction productivity, value engineering. TQM, constructability, construction safety, contract types, and contract bonds are presented. Building Information Modeling and Data Management software tools are used for illustrating the integrated information management process of a construction project.

Prerequisites & Corequisites: Prerequisites: CCE 4310 and CCE 4360.

Credits: 3 hours

Restrictions: Restricted to majors in Civil Engineering or Construction Engineering.

Lecture Hours - Laboratory Hours: (3 - 0)
