Install Drive File Stream on macOS 10.11+

If you used Google Drive in the past, uninstall the Google Drive application before proceeding.

1. Download Drive File Stream for macOS from:
   https://dl.google.com/drive-file-stream/googledrivefilestream.dmg

2. Once downloaded, launch the installer titled googledrivefilestream.dmg and proceed through the installation. Close the installer once it is completed.

3. Open Finder, navigate to Applications, and then click Google Drive File Stream. Sign in using your firstname.lastname@wmich.edu email address.
4. You will be redirected to a WMU login page. Enter your Bronco NetID and click Enter. On the following page, enter your password and click Login.

5. When prompted to allow Google Drive File Stream to access your account, click Allow.
5. You will now see the Google Drive File Stream welcome screen, which can be closed. A new Finder window will be displayed with your Google Drive data. Your Google Drive files are now accessible from the left navigation pane of Finder.

6. If you are using Drive File Stream on macOS 10.13 (High Sierra):

   a. At the top left, click the **Apple Menu > System Preferences > Security & Privacy**.

   b. Next to "System software from developer "Google, Inc." was blocked from loading," click **Allow**.
