Full-Time Employment Highlights

- 71% were employed full time.
- The median salary was $40,000–$45,000 based on 1733 reported salaries.
- 85% have a job related to their degree.
- 88% are satisfied with their job.
- 77% work in Michigan; 21% work in 48 other U.S. states; and 2% work in 26 countries outside the U.S.

Continuing Education

- 14% are pursuing further education after graduating from WMU.
- 51% are continuing education at WMU, and the remaining 49% will attend 116 different institutions.

Experiential Education

- 84% completed an experiential education activity.

"Absolutely life-changing experiences. Great faculty, welcoming staff, and inclusive environment."
About the Data

Career and Student Employment Services conducts the annual Post-Graduation Activity Survey on behalf of the University. The survey is conducted in accordance with the “Standards and Protocols for the Collection and Dissemination of Graduating Student Initial Career Outcomes Information” published by the National Association of Colleges and Employers (NACE).

Three weeks before each graduation, all graduating students receive an email from their college dean, department chairperson, or program director with a personalized link to the Post-Graduation Activity Survey. Survey respondents select one post-graduation activity category: working full time, working part time, further education or study, military service, volunteering full time (like Peace Corps, AmeriCorps, mission work), other commitments (e.g., family, travel, etc.), or looking for work.

Nonrespondents receive at least four reminders via email. For the graduates who have not responded to the survey after multiple invitations, we gather employment data from public LinkedIn profiles. Survey response rate was 61%, while the overall knowledge rate was 77%. Seventy-nine percent of the data in this report was obtained through the online questionnaire and 21% through LinkedIn.

Post-graduation activity data was updated throughout the year by following up with respondents who indicated they were seeking employment at the time of completing the survey. The data collection cycle ended on October 15, 2017.

Sixty-one percent (61%, N=1733) of respondents working full time reported a salary range. Salary information is reported only for full-time employment, and it includes salaries for jobs outside the United States. We publish median salary ranges for majors/programs with at least five reported salaries. At the end of the report we include national data from the Salary Surveys published by NACE. All salary data is provided for informational purposes only and is not intended to be used for comparisons or predictions.

The report lists all WMU majors for which sufficient data has been collected. Names of majors in the report align with those listed at wmich.edu/academics. If there are fewer than five primary activity responses for a program (or for one degree level of a program), data from 2015–16 is added and/or similar majors are combined. If there are fewer than five responses for a program from 2015–16 and 2016–17 together, the program is not included in the report. Data from 2015–16 is added only to the individual reports for the majors, not to the overall college or university reports.

There were 286 students who completed two or more majors during the graduation period. They are included once in each section of the report that corresponds to one of their degrees. No student’s data is ever counted twice in the same report section.

One purpose of this report is to help students with career exploration. To that end, reports for individual majors and programs include sample job titles and employer names.

NACE and Career and Student Employment Services acknowledge that the positive impact of a college education cannot be measured merely in terms of employment, earnings, or continued education. The most significant and substantive outcomes of personal and professional growth occur over the lifetime of the individual graduate.
Demographics

The target population for the Post-Graduation Activity Survey includes all WMU students who graduate with bachelor’s, master’s, or doctoral degrees during the year of the report. For 2016–17, we surveyed the 5205 students who earned their degrees between August 2016 and June 2017. Post-graduation activity data was obtained for 4016 graduates, or 77% of the population.*

The tables below show demographic distributions for the survey population and the respondent population. Demographic data was obtained from Cognos.

Experiential Education

Respondents were asked: “While at WMU, did you participate in an experiential education activity? (e.g., internship, co-op, practicum, research, service learning, student teaching, senior design project, senior performance project, capstone, or other work experience related to your field of study.) This includes activities that were required or optional in your program.”

84% of all WMU degree recipients participated in an experiential education activity.

- Indiana University
- Michigan State University
- Midwestern University
- University of Cincinnati
- University of Colorado
- University of Michigan
- University of Tennessee
- Wayne State University
- Western Michigan University
- WMU Cooley Law School

WMU graduates are pursuing further education in 160 fields of study.

Top fields of study

- Accountancy
- Behavior Analysis
- Biological Sciences
- Business Administration
- Civil Engineering
- Dietetics
- Law
- Medicine
- Occupational Therapy
- Physical Therapy
- Physician Assistant
- Psychology
- Social Work
- Speech and Language Pathology
Five Years of Post-Graduation Activity

For the last five years, 87% to 92% of WMU graduates have been actively engaged within 3 months of graduating.

Not pictured: military service and volunteer service. Each year, between 1% and 2% of graduates reported military or volunteer service as their primary post-graduation activity.

The chart to the right displays the knowledge rates for the Post-Graduation Activity Reports from the last five years. The report knowledge rate is the percentage of graduates for which WMU has obtained reasonable and verifiable post-graduation activity data. This data is obtained through the Post-Graduation Activity Survey and from public LinkedIn profiles.

"My experience at WMU has been life-altering to say the least. Because of the faculty and staff in my department I was able to find my passion and pursue it as a career. The compassion and support I received allowed me to continue despite obstacles. I will forever be indebted to WMU and try to show the same level of support to others throughout my life and career."
Arts and Sciences

Undergraduates’ Full-time Employment

- Median salary for undergraduate degree recipients in the College of Arts and Sciences was $30,000 to $35,000 (based on 187 responses).
- 82% had a job in Michigan.
- 67% had a job related to their degree.
- 76% were satisfied with their job.

"I've found the professors in my departments to be very inspiring and I'm so thankful that I've had the chance to learn from them."
Arts and Sciences

Graduate Students’ Full-time Employment

- Median salary for graduate degree recipients in the College of Arts and Sciences was $47,500 to $52,500 (based on 130 responses).
- 60% had a job in Michigan.
- 90% had a job related to their degree.
- 87% were satisfied with their job.

Graduate Salaries

"The most important aspect of my career development at WMU was working with my mentors on research and education projects. The coursework was of course vital, but assuming this is somewhat standard, the connections and skills I gained from working were instrumental in my finding a good graduate appointment."

*The most important aspect of my career development at WMU was working with my mentors on research and education projects. "WMU is a first class organization. I loved my time as a student for both my graduate and undergraduate degrees!"
Education and Human Development

Undergraduates’ Full-time Employment

- Median salary for undergraduate degree recipients in the College of Education and Human Development was $30,000 to $35,000 (based on 130 responses).
- 79% had a job in Michigan.
- 92% had a job related to their degree.
- 95% were satisfied with their job.

Undergraduate Salaries

"I would not be the person I am today without Western Michigan University. I learned so much and made so many relationships that I will have for the rest of my life. I cherish my time at Western Michigan University and I am so proud to call myself a Bronco."
Graduate Students’ Full-time Employment

- Median salary for graduate degree recipients in the College of Education and Human Development was $45,000 to $50,000 (based on 179 responses).
- 84% had a job in Michigan.
- 91% had a job related to their degree.
- 90% were satisfied with their job.

Graduate Salaries

"WMU has been an amazing place to call home for graduate school. The focus is about the students and bettering the community, and that proves true with everything I have experienced while here. It's an honor to be a WMU graduate and feel this institution was the perfect choice that has helped me feel empowered, allowed me to develop into a better me, and gave me opportunities to engage fully into my program of choice."

About the Data
Graduating students were asked to provide their information through the WMU Post-Graduation Activity Survey within three months of their date of graduation. Some additional data was obtained from students’ public professional profiles.

All information is based on the most recent data from 2016–17 graduates, combined with data from 2015–16 graduates which was collected near the time of their graduation. We report two years of data together due to low numbers of responses.

"WMU has been a great experience, both educationally and personally. I have had the opportunity to make friends from around the world in a study abroad opportunity in China, made a lot of friends within my major, and connections with people that are far from my major. I was able to participate and keep dance in my life through Hip Hop Connexions and got to show some new students around a campus that has given me so much experience and knowledge. My relationship with my major’s professors is very strong, and I do not think I could have made these impressions anywhere else."
Engineering and Applied Sciences

Undergraduates’ Full-time Employment

- Median salary for undergraduate degree recipients in the College of Engineering and Applied Sciences was $60,000 to $65,000 (based on 187 responses).
- 81% had a job in Michigan.
- 96% had a job related to their degree.
- 95% were satisfied with their job.

Continuing Education

- 6% of Engineering and Applied Sciences respondents are pursuing further education after graduating from WMU.
- After graduation, 55% of Engineering and Applied Sciences respondents are pursing doctoral degrees, 39% masters, and 6% certification programs.
- 67% are continuing education at WMU, and the remaining 33% will attend 8 different institutions.

Experiential Education

Respondents were asked: “While at WMU, did you participate in an experiential education activity? (e.g., internship, co-op, practicum, research, service learning, student teaching, senior design project, senior performance project, capstone, or other work experience related to your field of study.) This includes activities that were required or optional in your program.”

Sample Job Titles and Employers

Civil Engineer at CAE USA
Project Engineer at AVB Construction

About the Data

Graduating students were asked to provide their information through the WMU Post-Graduation Activity Survey within three months of their date of graduation. Some additional data was obtained from students’ public professional profiles.

All information is based on the most recent data from 2015–16 graduates, combined with data from 2015–16 graduates which was collected near the time of their graduation. We report two years of data together due to low numbers of responses.

*Just wanted to acknowledge and convey my appreciation to my faculty for their flexibility and encouragement to enable me to complete my last MBA course. They taught me a lesson of humanity that transcended the subject matter of the course and demonstrated a depth of character within the WMU faculty that cannot be measured with a ruler or weighted on a scale. Their actions not only made me proud to be alumni of WMU, but influenced me to every day strive to be a better professional and ultimately a better person for society. I am perpetually grateful.

About the Data

Graduating students were asked to provide their information through the WMU Post-Graduation Activity Survey within three months of their date of graduation. Some additional data was obtained from students’ public professional profiles.

All information for graduate degrees is based on the most recent data from 2016–17 graduates, combined with data from 2015–16 graduates which was collected near the time of their graduation. We report two years of data together due to low numbers of responses.

We empower students to develop the skills necessary for reaching their career goals.

Career decision making
Job skill development
Job attainment

HANDSHAKE
25,191 jobs
4,680 internships
15,271 employers

CAREER EDUCATION
1,750 students in career advising
179 workshops

EMPLOYER ENGAGEMENT
883 employers at job fairs
149 programs with employers

11,325 students served through career education programming, advising, and employer engagement activities.
